Kansas City Community Gardens empowers low-income households, schools and community groups to grow their own vegetables and fruit. We’re here to provide affordable resources and share knowledge so that anyone who is willing to roll up their sleeves and dig in the dirt can be a successful gardener! We offer a membership program for home gardeners. Members receive access to low-cost seeds, plants, supplies and services. Annual membership fees range from $2 to $45, based on household size and income. See page 2 for more details. Interested in starting a school or community garden or orchard? KCCG is here to help you! See page 2 for more information on the programs we offer for community sites.

Schoolyard Gardens: Kids who learn to grow veggies learn to love veggies! KCCG’s Schoolyard Gardens team supports schools in establishing and sustaining learning gardens, where kids from pre-school to high school are encouraged to dig in and get their hands dirty. Teachers gain access to a library of lessons plans and educational resources that help them engage kids in all parts of the growing process. Our team offers training workshops for teachers, onsite garden check-ins and low-cost resources - all schools need to successfully inspire their kids to grow and love healthy foods!

Come Grow With Us!

At KCCG, we believe everyone should be able to enjoy fresh, healthy foods. To accomplish that vision, we’re proud to support a network of home and community garden and orchard sites throughout Kansas City. We offer low-cost seeds, plants and supplies, tilling services, educational resources and more. Whatever your gardening goal - we can help!

Last year, more than 45,000 households harvested food from a KCCG-supported garden or orchard. Put another way, KCCG’s support reaches in every 19 households in the KC metro. That’s a lot of gardens!

More than 3,427 home gardens

230 School Gardens

255 Community Orchards

Which Program Is Right For You?

Individual & Family Gardens: Are you growing a garden at home, or renting a plot in a community garden? Sign up for a membership with KCCG and gain access to low-cost pricing on seeds, plants and garden supplies. We offer four levels of memberships, based on household income and size:

- Green Card memberships are $2
- Yellow Card memberships are $15
- Orange Card memberships are $30
- Blue Card memberships are $45

Memberships are purchased on an annual basis and are good from October 1 to September 30. With your membership, you’ll receive 10 packs of seeds and a 10-pound bag of fertilizer. You’ll also gain access to member-level pricing on additional seed packs, vegetable transplants, fruit trees and berry plants, gardening tools and supplies, rental plots at KCCG gardens, tilling services, free educational resources, technical consultations and more.

To enroll, visit KCCG’s Swope Park Headquarters or sign up online at www.kccg.org/become-a-member.

Rent A Plot Gardens: Are you ready to garden but don’t have space to grow at home? KCCG manages 9 large community garden sites that provide a perfect solution for gardeners who live in apartments or have shady backyards. We offer 4x12’ raised beds and 20’x 25’ ground plots, depending on location. KCCG has nine community garden sites with ground plots and/or raised beds for rent:

- Ivanhoe/Richardson (36th and Park, KCMO)
- Eastwood Hills (8100 Ozark Rd, KCMO)
- Prospect (5008 Prospect, KCMO)
- Freeway Park (1412 Indian, KCMO)
- Kauffman Legacy Park (4750 Troost Ave., KCMO)
- Jerse Creek (11th and Parallel Pkwy, KCK)
- Northrup Park (11000 Northrup Dr, Northland, KCK)
- Health Medical Center (2316 E. Meyer, KCMO)
- Swope Park Community Garden (6917 Kensington, KCMO)

You must have a current KCCG membership to rent a bed. Raised beds are $8 for Green Card members and $20 for Yellow and Orange Cards and $25 for Blue Card members. Ground plots are $10 for Green Card members and $25 for Yellow and Orange Card members and $30 Blue Card members. To inquire about availability, contact phill@kccg.org or call 816.931.3877, Ext. 302. Please note that garden sites fill quickly and your name may be added to a waiting list.

Community Partner Gardens: Are you interested in starting a community garden in your neighborhood? Or you are part of an existing garden that could use a little extra help? KCCG works with community gardens in partnership with other organizations, communities of faith, health facilities, housing complexes, youth agencies and more to build and sustain food-producing gardens. Our team can guide you through choosing a site, constructing your garden and engaging community members to share in the work. Once you’re up and running, we can provide you with low-cost seeds, plants and supplies, tilling services and assistance with troubleshooting challenges as they arise.

Contact the Community Partner Garden team at cpg@kccg.org or 816.931.3877, Ext. 314 to learn more.

Giving Grove Neighborhood Orchards: Fruits, berries and nuts provide a long-term, sustainable source of healthy foods. An average 15-tree orchard can produce more than 12,000 servings of fruit each year. Ready to start your own? You can grow your own orchard with KCCG’s Giving Grove.

Prospect (5008 Prospect, KCMO)

Eastwood Hills (8100 Ozark Rd, KCMO)

Ivanhoe/Richardson (36th and Park, KCMO)

Jersey Creek (11th and Parallel Pkwy, KCK)

Northrup Park (11000 Northrup Dr, Northland, KCK)

Research Medical Center (2316 E. Meyer, KCMO)

Swope Park Community Garden (6917 Kensington, KCMO)

The Leanna Flandermeyer Beanstalk Children’s Garden, located at KCCG’s Swope Park Headquarters, is a unique urban learning environment where children are invited to see, smell, touch and taste growing plants. As kids make their way through the garden, they’ll learn how their food is grown, discover new healthy favorites and leave inspired to make healthy choices.

KCCG offers guided group tours for $4/person. Scholarships may be available upon request. Please schedule group tours in advance by emailing us at tours@kccg.org or calling 816.931.3877 Ext. 302. Families may visit the garden for self-guided tours any time we are open and without scheduling in advance.

Self-guided tours are free (donations accepted).

The Seven Gardens of the Beanstalk

Vegetable Garden

The Vegetable Garden is filled with a rainbow of colorful plants that are jam-packed with nutrients. Stop here to see familiar favorites and discover new and unusual vegetable varieties.

Seed & Grain Garden

Seeds and grains make up a significant portion of our diet. Learn about the plants that go into many of your favorite foods as you way through the Seed & Grain Garden.

Fruit Garden

From sweet to tangy and crisp to juicy, the Fruit Garden and Demonstration Orchard are filled with fruit trees, nuts, berries, and brambles that will excite and delight your taste buds.

Curiosity Garden

You’ll need all of your senses for a visit to the Curiosity Garden. Touch, smell, taste and see your way through this garden of fun and unusual plants.

Herb Garden

The Herb Garden is a feast for your eyes and nose alike. Here, you’ll discover plants that are used for a wide variety of purposes – from cooking to fragrances and even medicine.

The Leanna Flandermeyer Beanstalk Children’s Garden is open June 3 to mid October for guided tours. Free walk-in visitors are welcome anytime between 9am-5pm Mondays-Fridays and 9am-12pm on Saturdays during the summer.

Saturdays are Scout Days in the Beanstalk Garden!

KCCG offers Girl Scout badge workshops and Scouts BSA Adventure Days. Admission is $15 per scout, adult chaperones attend free of charge. Scholarships may be available upon request. For more information including dates and times of workshops, visit www.kccg.org/scout-badge-schedule

To register for workshops, email tours@kccg.org or call 816.931.3877 (ext. 302).

Not Just For Kids!

Don’t let its name fool you – the Beanstalk is a fascinating space for people of all ages, not just children. You’ll find many of the seed and plant varieties that KCCG offers to gardeners growing in the Beanstalk, including fun and colorful varieties from our Beanstalk Seeds line. The next time you’re at the KCCG office, plan a little extra time to take a tour and see what’s growing here!

Hours

The Beantalk Children’s Garden is open June 3 to mid October for guided tours. Free walk-in visitors are welcome anytime between 9am-5pm Mondays-Fridays and 9am-12pm on Saturdays during the summer.

Fall Family Festival

On September 21, join us in the Beanstalk for the Fall Family Festival! This event is free fun for the whole family with activities, exhibits and more!

Water Garden

Step into an urban oasis with a visit to the Water Garden. This inviting garden is home to animals, like fish and toads, and water plants, like papyrus, water lilies, and cattails.

Insectary Garden

The Insectary Garden is filled with different types of plants that attract, feed, and shelter beneficial insects that help with pollination and pest control for fruits and vegetables.

Fall Family Festival

On September 21, join us in the Beanstalk for the Fall Family Festival! This event is free fun for the whole family with activities, exhibits and more!
I’m ready to get growing! Where do I start?  

Step 1: Plan Your Garden

First things first - decide what vegetable and fruit plants you’d like to grow. KCCG offers a large catalog of seeds and fruit and vegetable plants. Spend some time perusing all of our offerings on pages 6-14 and make a list of everything that looks interesting or tasty.

Next, make a planting plan. It’s helpful to measure your garden space and draw out a planting diagram for the spring, summer and fall seasons. Use the planting calendar at right and the list of fast- and slow-growing crops to help you know when to plant and how long to allow space for the plant in your garden. With a little practice, you can rotate crops through the seasons to get maximum

Step 2: Check Out our Online Resource Library

KCCG’s website is host to an extensive library of gardening resources. From guidesheets to short how-to videos and full-length workshop recordings, if you have questions, we probably have answers!

KCCG’s website is host to an extensive library of gardening resources. From guidesheets to short how-to videos and full-length workshop recordings, if you have questions, we probably have answers!

You’ll find all these at www.kccg.org/planting-plan.

Step 3: Make Plans to Attend a Free Workshop

Learn from KCCG’s team of experts at one of our free gardening and cooking workshops (see details below).

Pre-registration is required.

To sign up, visit www.kccg.org/workshops or call 816-931-3877. Workshops in 2024 will be live but we will have videos of all our workshops on our virtual workshop page: www.kccg.org/virtual-workshops

Step 4: Come Visit Us with Questions

Still have questions, or puzzled by something that’s not quite right in your garden? Stop by the KCCG office and visit with our staff. Technical assistance is provided to members free of charge.

2024 Free Workshops

KCCG will host the workshops below at our Swope Park Headquarters (6917 Kensington Ave / KCMO, 64132). We will also partner with Kansas City Public Libraries to host satellite workshops at several libraries in KCMO.

For more information on all workshops and to sign up for a workshop, visit www.kccg.org/workshops.

BERRIES

Available March 21st (Green & Yellow Cards) & March 22nd (Blue Cards)

Cavendish’ Strawberry - Produces huge, red, round berries with a very sweet flavor.

Natchez’ Thornless Blackberry
Large thornless canes produce a great number of very large, black, delicious berries with outstanding flavor. Plants rooted in clay soil and spread wide. Ripens mid-late May. Sold in bundles of 10, limit 10 bundles.

APPLE

‘Williams Pride’ Apple (continued)
Field immune to scab, highly resistant to apple-cider rust, fire-blight and powdery mildew. A PRI selection.

Cherry

Ornamental - $5.00 each

Raspberry

Yellow Card = $3.50/bundle of 10
Orange Card = $4.50/bundle of 10
Blue Card = $5.00/bundle of 10

All Fruit Trees - Includes Apple, Cherry, Jujube, Peach, and Pear
Green Card = $25.00/each
Yellow Card = $35.00/each
Orange Card = $45.00/each
Blue Card = $55.00/each

APPLE

‘Pristine’ Apple (mid-late season flowering)
On M.7 semi-dwarf rootstock 12-15’ - Ripens early-mid July to a golden yellow color with a pink blush and are tart and mild with a sweet finish. Tree is a heavy bearer, and will need thinning. Immune to apple scab, has good resistance to cider-apple rust, and has good resistance to powdery mildew and fire-blight.

‘Liberty’ Apple (early-mid season flowering)
On M.7 semi-dwarf rootstock 12-15’. Liberty is very similar to appearance to McIntosh, but its flavor is a bit more tart and its flesh is crisper. 6-8 medium-sized, ripe red to deep red, with a creamy white flesh in early to mid-September.

‘Ruby Blast’ Apple (mid-season flowering)
On M.7 semi-dwarf rootstock 12-15’. New introduction. Tree is 8-10’ tall. ‘Ruby Blast’ is a hardy, high-yielding apple with an excellent flavor. Plants root in clay soil and spread wide. Ripens mid-late September.

‘Enterprise’ Apple (mid-late season flowering)
On M.7 semi-dwarf rootstock 12-15’. A glossy, large (12-16oz) red apple with an excellent spritely flavor that is resistant to scab and storage. A crisp, productive, vigorous, and spreading. Fruit ripens late September. It is an excellent keeper, is immune to scab and resistant to fire blight, cider apple rust and powdery mildew. A PRI selection.

‘Williams Pride’ Apple (early-mid season flowering)
On M.7 semi-dwarf rootstock 12-15’. Dark red, round, flavorful flesh with excellent tart fruit quality, ripens in early August. (continued)

Asian Pear

Listed in order of ripening. Trees need another variety (pollinator) to ensure pollination unless noted.

‘Chojuro’ Asian Pear - On Calleryana rootstock 12-15’ - Russet-orange color in mid-August. Flavor of caramel and butter with a slight kick of cinnamon. Ripens intensively throughout the ripening time. Well thickened fruits will be 5-10 ounces. Tree has good resistance to fire-blight in our area.

‘Yoinashi’ Asian Pear - On Calleryana rootstock 12-15’ - ‘Yoinashi’ is said to mean ‘Good Pear’ in Japanese. This round brown skinned fruit is crisp, spicy and aromatic. It sets a heavy crop of small to medium-size pears at mid to late August. Good fire-blight resistance.

‘Shinko’ Asian Pear - On Calleryana rootstock 15-18’ - Fruit is medium size to large (10-16 oz.) with a brown to golden brown russet color. Flesh is yellowish white with a good juicy, sweet flavor. Ripens in early September. 1.2 weeks after Yoinashi. Stores 3 to 4 months. Good fire-blight resistance.

‘Korean Giant’ Asian Pear - On Calleryana rootstock 15-18’ - ‘Korean Giant’ is a large fruit that ripens mid-early September. Stores for 6 months. Very productive, vigorous, and hardy. Ripens late in September. 3 months storage. Good fire-blight resistance.

‘Montmorency’ Hybrid Sweet Tart-Cherry
On OHx97 semi-standard rootstock, 20-25’ - ‘Montmorency’ is a heavy bearer, with good flavor and berry size. Easy to grow and enjoy. Ripens mid-June to early July.

‘Lapins’ Sweet Cherry - On Kysm 5, semi-dwarfing rootstock, 12-16’. Good overall disease resistance and attractive 3” round fruit. ‘Laplins’ is a dark red color that ripens mid-July. Ripens early in July.

‘Balaton’ Hybrid Sweet-Cherry Tree
On Mahaleb semi-standard rootstock, 20-25’ - ‘Balaton’ is a late-blooming, crack-resistant cherry, this fruit is tart with red flesh, like ‘Juliet’, but later ripening, mid-late June.

‘Carmine Jewel’ Tart Bush Cherry
On Mahaleb semi-standard rootstock 20-25’. ‘Carmine Jewel’ is an excellent cherry variety that is adaptable to most garden sites. Productive once established. ‘Carmine Jewel’ is a summer variety that replaces Jersey Knight that is no longer available for sale. Limit - 5 bundles.

‘Millennium’ - A male variety that is adaptable to most garden sites. Productive once established. ‘Millennium’ is a fall variety that replaces Jersey Knight that is no longer available for sale. Limit - 5 bundles.

Music’ Hardneck - A cold-hardy, spicy and incredibly flavorful garlic. Easy-to- peel cloves with white pericarp outer skin and pink- tinged clove skin.

LEEK

Available March 18th
Member Price (with a few cloves per lb.) $2.50
Non-Member Price (20-30 plants per lb.) $4.00

Lancelot’ - 75 days. White bottoms with blue/green upright top. Long 12 - 18” stalks. Look great and have excellent resistance to leaf blight, excellent storage length sensitivity if you keep Blanching them (throwing dirt up the stem).

PEACH

‘Jubileum’ Peach - Calleryana semi-standard rootstock 20-25’ - ‘Jubileum’ is a newer variety that is adaptable to most garden sites. A PRI selection.

‘Dona’ Peach - Available on OHxF97 semi-standard rootstock 20-25’. This is a medium-size freestone variety. Ripens in mid July. ‘Dona’ is a yellow fruited variety. A PRI selection.

‘Redhaven’ Peach - Species 97-12’ - ‘Redhaven’ is a mid-season freestone variety. Ripens early in August. A PRI selection.

‘Catalina’ Peach - Available on OHxF97 semi-standard rootstock 20-25’. This is a medium-size freestone variety. Ripens in late August. A PRI selection.

‘Jubilee’ Peach (mid-season flowering)
On Calleryana rootstock 15-18’ - Fruit is large medium to large (12-16 oz.) with a brown to golden brown russet color. Flesh is yellowish white with a good juicy, sweet flavor. Ripens in early September. 1.2 weeks after Yoinashi. Stores 3 to 4 months. Good fire-blight resistance.

‘Shinko’ Asian Pear - On Calleryana rootstock 15-18’ - Fruit is medium size to large (10-16 oz.) with a brown to golden brown russet color. Flesh is yellowish white with a good juicy, sweet flavor. Ripens in early September. 1.2 weeks after Yoinashi. Stores 3 to 4 months. Good fire-blight resistance.

‘Korean Giant’ Asian Pear - On Calleryana rootstock 15-18’ - ‘Korean Giant’ is a large fruit that ripens mid-early September. Stores for 6 months. Very productive, vigorous, and hardy. Ripens late in September. 3 months storage. Good fire-blight resistance.
**ONION SETS**
Available March 4th
Price TBD based on market rates.
Recommended for growing green onions.

**Red, Yellow & White**

**ONION PLANTS**
Available March 18th

*Perennial vs Annual vs Biennial*

Perennial plants grow every spring. Annual plants live for only one growing season, then die off. Biennial plants grow the first year and flower/fruits and die the next year.

**Basil** — variety: ‘Prosperity’ - This is a classic Genovese (Italian) basil variety with impressive resistance to mildew. Fast growing, dark green, glossy leaves and traditional aroma. Basil is an extremely important culinary herb and fresh basil is an essential ingredient for many recipes. If you let it flower, it slows the leaf growth but provides forage for bees. 24-28’ tall (Annual)

Cardinal Basil - Ornamental and edible “That type” basil with larger leaves and showy purple stems and attractive purple-red flowers.

**Onion Chives** - This is the standard garden chives. Long green stems with onion flavor. Purple blossoms in spring. Chives are a member of the onion family. It grows in clumps that get deeper but can be cut repeatedly and will regrow. Very tolerant of cold weather. Use fresh or sautéed to add “green” to all of your dishes. High in vitamins C and K (perennial).

French Sorrel - This leafy herb is very popular in France. It is used to flavor dishes with basil and garlic. Most common uses are in salads and as an ingredient in soups and stews. It is also a great addition to the garden. 12-18” tall (Perennial)

**Summer Savory** (compact variety) - This is a classic savory thyme which is very popular for use in many dishes. Thyme has a complex flavor and fragrance and it goes well with many spices. It looks great with other flowers. This savory has a strong, spicy flavor. (Perennial)

**Flat leaf parsley** (variety: “Giant of Italy”) - This preferred culinary variety has huge dark green flat leaves with great flavor. Strong upright stems. Parsley is an important culinary herb that is very nutritious — high in vitamins and minerals. Parsley leaves are very cold tolerant and will live over the winter and flower in the spring and then die. Parsley is a host for black swallowtail butterfly caterpillars. Biennial

**Marjoram** - Sometimes called “Sweet Marjoram”, this culinary herb is a relative of oregano and is grown as an annual in our region. It is an important ingredient in the famous herb mix “Herbes de Provence” and is used in soup and vegetable seasonings. Stems, salad dressings, sauces and herbal teas. Marjoram is also sometimes used medicinally for various purposes.

**Eggplant** (Greek oregano) - This popular variety is considered essential for Italian and Greek cooking. The growing season is very short, but it will produce flowers as well as attractive clusters of small light purple flowers that attract many beneficial pollinators. Can be used fresh or dried. (Perennial)

**Rosemary** - This popular herb is actually a woody shrub from the Mediterranean region. It is very slow to dry out and does not survive very well here. The leaves are silvery green and needle-like with distinct fragrant spice. Used fresh or dry in many savory dishes. (tender perennial)

**Sage** — Beautiful green leaves with distinctive scented accomplished by gorgeous spikes of small blue lavender flowers in early summer. The leaves are usually dried for use in cooking. Dried Sage is the herb used to give dishes “that sage” distinctive flavor. Does best in well drained soil. (Perennial)

**Tomato Variety Information and Code Designations:**

- **CHERRY TOMATOES**
  - Black Cherry - 64 days - Sweet and robust, round fruits almost black in color. Dark red vines. Height: 24” (indeterminate) (open pollinated)
  - Mexican Mini - 65 days - Small fruited variety but very tasty and productive. The fruits are 1” in diameter, dark red flesh. (hybrid) (indeterminate) (open pollinated)
  - Sun Gold Cherry - 57 days - Tangerine-colored, sweet, maraschino-colored tomatoes on high yielding plants. (indeterminate) (hybrid)

- **Super Sweet 100** - 70 days - VF Plants (Hybrid) Comments: Kitt 100 of one of the most popular super sweet cherry tomatoes, measuring approximately 1” in diameter. Extra-high in vitamin C. (indeterminate) (hybrid)

- **Sweet Chelsea** - 67 days - (VFHTTNA) Cherry tomato with large 2+ super sweet fruit. Vigorous. 3’ plants should be staked. (indeterminate) (hybrid)

**BEETS**

- **Detroit Dark Red** - 45-70 days - 2.5-3” globe roots of blood-red color. For canning and fresh use.
- **Early Wonder Tall Top** - 45 days - Earliest beets and greens. Large vigorous tops. Taller than most beets, producing long strands of leafy topped roots, slightly flattened red roots.

**CANTALOUPE (MUSKMELON)**

- **Delicious 5** - 81 days - Early large fruits, 4.5 lbs. Good fruit flavor, thick rind. salad-melon flesh. Fusarium wilt resistant.

- **Hale’s Best No. 36 Cantaloupe** 80 days - The fruit is highly flavored, beautiful and solidly netted, little if any suture and no rind. Salmon colored flesh. Fruit 2.5 lbs, uniform in size, slight oval shape.

**CARROTS**

- **Nantes-2** - 45 days - Early to 10-12” tops with 6” x 1” bright red orange blunt roots. Good fresh or frozen.
- **Royal Chantenay** - 65 days - Cylindrical yam-shaped roots. Tops are sturdy, 15-20” Dependable heavy yields.

**CORN**

- **Rodacous** - 75 days - An extremely high quality yellow corn. Very sweet and tender. Plants are 87” tall with 8” long ears. (hybrid)
- **Peaches & Cream** - 70 days - Matures early in the season, 8.5” long ears with paste, 4.5 color kernels. Good for fresh eating. (hybrid)
- **Robust** (popcorn) - 110 days - Early maturing gourmet yellow popcorn. 7” tall plants with 1-2” kernels. (hybrid)

**CUCUMBER**

- **Asparagus Yard Long** - 80 days - Plants grow to 10” high, produce asparagus-like cucumbers. Garnet in color.
- **Ben’s 35** pods till frost.
- **Jackson Wonder Lima Butterbean** - 66 days - A good hot weather variety. Long, bearing plants with stringless pods. Provider - 50 days - The most popular early Lima bean. 7” long, 1” thick blanched flesh, creamy flesh. Adapts to diverse locations, soil, and climate conditions.

**Green**

- **Detroit Dark Red** - 45-70 days - 2.5-3” globe roots of blood-red color. For canning and fresh use.
- **Early Wonder Tall Top** - 45 days - Earliest beets and greens. Large vigorous tops. Taller than most beets, producing long strands of leafy topped roots, slightly flattened red roots.

**KALE**

- **Detroit Dark Red** - 45-70 days - 2.5-3” globe roots of blood-red color. For canning and fresh use.
- **Early Wonder Tall Top** - 45 days - Earliest beets and greens. Large vigorous tops. Taller than most beets, producing long strands of leafy topped roots, slightly flattened red roots.

**BEANS, BUSH**

- **Beans, Bush** - Early-maturing large, flat-round green beans. (Indeterminate)

- **Blue Lake** - 70 days - Outstanding branching plants produce heavy yields under adverse conditions. Pods are slow to form seeds or fiber. A classic canning and freezing bean.

**CHERRY TOMATOES**

- **Cherokee Yellow Wax** - 51 days - Pale yellow pole pods on vigorous, hardy, 16’-18” bushes.

**Corn**

- **Henderson Lima** - An early green bean. 5” long, medium green pods. Slow to bolt, give two or three plants for best results. (hybrid)

- **Kentucky Wonder** - 66 days - A good hot weather variety. Long, bearing plants with stringless pods. Provider - 50 days - The most popular early Lima bean. 7” long, 1” thick blanched flesh, creamy flesh. Adapts to diverse locations, soil, and climate conditions.

- **Royal Chantenay** - 65 days - Cylindrical yam-shaped roots. Tops are sturdy, 15-20” Dependable heavy yields.

- **Rodacous** - 75 days - An extremely high quality yellow corn. Very sweet and tender. Plants are 87” tall with 8” long ears. (hybrid)

- **Peaches & Cream** - 70 days - Matures early in the season, 8.5” long ears with paste, 4.5 color kernels. Good for fresh eating. (hybrid)
- **Robust** (popcorn) - 110 days - Early maturing gourmet yellow popcorn. 7” tall plants with 1-2” kernels. (hybrid)

**CUCUMBER**

- **Asparagus Yard Long** - 80 days - Plants grow to 10” high, produce asparagus-like cucumbers. Garnet in color.
- **Ben’s 35** pods till frost.
- **Jackson Wonder Lima Butterbean** - 66 days - A good hot weather variety. Long, bearing plants with stringless pods. Provider - 50 days - The most popular early Lima bean. 7” long, 1” thick blanched flesh, creamy flesh. Adapts to diverse locations, soil, and climate conditions.

**Green**

- **Detroit Dark Red** - 45-70 days - 2.5-3” globe roots of blood-red color. For canning and fresh use.
- **Early Wonder Tall Top** - 45 days - Earliest beets and greens. Large vigorous tops. Taller than most beets, producing long strands of leafy topped roots, slightly flattened red roots.

**KALE**

- **Detroit Dark Red** - 45-70 days - 2.5-3” globe roots of blood-red color. For canning and fresh use.
- **Early Wonder Tall Top** - 45 days - Earliest beets and greens. Large vigorous tops. Taller than most beets, producing long strands of leafy topped roots, slightly flattened red roots.
**OKRA**
Burgundy - 55 days - Bears moderate at first, then a ton of red burgundy pods. Pods turn green when cooked.

Clemson Spineless - 55 days - The most popular okra variety available.

Dwarf Green Long Pod - 50 days - Pods are very bright green and tender, with an excellent flavor.

**SWISS CHARD**
**DARK RED ORANGE**
Fordhook Giant - 60 days - Tall, productive, blue-green leaf. Great for fresh harvest in fall for salads, soups, or stir fries. 

**WHITE**
**DANCE**
Green Arrow (English pea) - 50-78 days - Strong, vigorous vines. Excellent for cooking green or freezing. White pea with small eye. Two crops in a season in this region.

**PEAS, SOUTHERN (COWPEA)**
**FOOD**
Carrot 'Rainbow Blend' - 70 days - Mix of purple, yellow, orange, red and white. Excellent for growing in containers or under row cover without pollination.

**FLEURS**
Dames Rocket - Hardy biennial. Lilac-purple flowers are concentrated at the ends of stalks, followed by flat seed pods. Fragrant in plant-warmed soil in full sun or partial shade. Blooms in April and May.

**GOURDS**
Marigold, Crackerjack - A tall African variety with chocolate cut flowers, growing about 30" tall. Great for cutting. Some are very fragrant. Varieties are available.

**FRUITS & VEGETABLES**
**100**
Guinea Hen - 25-30 days - Produces a good yield of small female flowers. Excellent for making crafts, birdhouses, dippers, etc. 

**150**
Sugar Baby - 76 days - Round fruits 6-8" in diameter. Short, light green, bakes dry and sweet.

**250**
Passion Flower 'Ambrosia' - 75 days - Produces abundant cilantro foliage in a single season. Full sun. Will not produce seeds.

**1000**
Malabar Spinach (Red) - 60 days - Very productive. Great for early spring or fall gardens. Will grow under most conditions. 

**BEANSTALK SPECIALTY SEEDS**
Beanstalk Specialty Seeds are unique and colorful plant varieties that are grown in KCCG’s Beanstalk Children’s Garden. They’re a great resource for families who are introducing kids to gardening. Proceeds from the Beanstalk Seed line help to support KCCG’s mission and work to increase healthy food access for all!

**BEANSTALK CHILDREN’S GARDEN**
Mission as we work to increase healthy food access for all!

**FLOWERS**

Hyacinth Bean ‘Ruby Moon’ - This vigorous-growing tropical vine has purple flowers, beans and leaves. The flowers are the best tasting part of this plant; they have a nice crunchy, beaney flavor but the pods are not especially good tasting and the dry seeds are toxic. Vines grow very long so support is needed. Flowering begins in July or early August going until frost. This is one of the scarlet vine plant of the Beanstalk Children’s Garden.

Marigold ‘Safari Mix’ - Beautiful blend of orange and scarlett-colored flowers. Sturdy, semi-dwarf plant (6” to 16”) with large double-bloom flowers 1” to 2” across. Start indoors 4-6 weeks before last frost, around March 20-30.

Moonflower, White - 5” blooms open in the evening with a sweet fragrance. Vines grow 10-20’ long.

Morning Glory ‘Clark’s Heavenly Blue’ Vine - For a stunning display of soft pink flower puffs. Reseeds and self-serve. Mature peanuts are delicious freshly dug. An early-maturing peanut that is a good choice for shorter growing seasons. Mature peanuts are delicious freshly dug. They have a sharp, sour lemony flavor but the pods are not especially good tasting and the dry seeds are toxic. Vines grow very long so support is needed. Flowering begins in July or early August going until frost. This is one of the scarlet vine plant of the Beanstalk Children’s Garden.

**FRUIT**

**Cotton** - 165-180 days - This is the same cotton variety used for your t-shirts and jeans. Some varieties have naturally colored fibers instead of white. Grow it from the seed to hold them together. Cages may have sharp edges and rust. A truck bed is the best way to transport them. Please be prepared to take cages with you at the time of purchase. We are not able to hold cages for anyone.

**Tomato ‘Sun Gold Cherry’** - 60 days - Very plump, round cherry tomato. Has a distinctive sweet flavor but the pods are not especially good tasting and the dry seeds are toxic. Vines grow very long so support is needed. Flowering begins in July or early August going until frost. This is one of the scarlet vine plant of the Beanstalk Children’s Garden.

**Pear ‘Gypsy’** - 2-3 fruits per plant.

**Turnip ‘Hakurei’** - 2” round globes with smooth skin. The roots are white. Young leaves are best. Can be eaten in salads or cooked gently for soups.

**Pumpkin ‘Kakai’** - 100 days - Eye-catching, medium-small, avg. 5 lbs. Black striping and orange flesh. A very deep orange color. After displaying the pumpkins next fall, you can cut out the largest ones into completely full-sized pumpkins, which are absolutely delicious roasted. Semi-bush, short-vined. Average yield 2–3 fruits per plant.

**Radish ‘Easter Egg’** - 30 days. This seed packet will produce beautiful radishes in a variety of colors (red, white, pink, purple) that are fun for kids to pick and eat. The roots grow larger than standard varieties and stay crisp and mild even when large.

**Turnip ‘Hakurei’** - 2” round globes with smooth skin. The roots are white. Young leaves are best. Can be eaten in salads or cooked gently for soups.

**Marigold ‘Safari Mix’** - Beautiful blend of orange and scarlett-colored flowers. Sturdy, semi-dwarf plant (6” to 16”) with large double-bloom flowers 1” to 2” across. Start indoors 4-6 weeks before last frost, around March 20-30.

**Moonflower, White** - 5” blooms open in the evening with a sweet fragrance. Vines grow 10-20’ long.

**Morning Glory ‘Clark’s Heavenly Blue’** Vine - For a stunning display of soft pink flower puffs. Reseeds and self-serve. Mature peanuts are delicious freshly dug. An early-maturing peanut that is a good choice for shorter growing seasons. Mature peanuts are delicious freshly dug. They have a sharp, sour lemony flavor but the pods are not especially good tasting and the dry seeds are toxic. Vines grow very long so support is needed. Flowering begins in July or early August going until frost. This is one of the scarlet vine plant of the Beanstalk Children’s Garden.

**Squash** - 60 days - 2–2 1/2” round globes with smooth skin. The flowers in blue with some pink. Mild broccoli flavor for salads and garnishes. 18” height. (annual)

**Squash** - 60 days - 2–2 1/2” round globes with smooth skin. The flowers in blue with some pink. Mild broccoli flavor for salads and garnishes. 18” height. (annual)

**Garden Supplies**

In addition to seeds and plants, KCCG offers a variety of recommended garden supplies at low cost. You must be a 2024 KCCG member to purchase. Garden supplies available while supplies last. For a full list of garden supplies, please visit www.kccg.org/garden-supplies or scan the QR Code to the right:

**PLEASE NOTE: Garden supplies will be sold at market price.**

**Fin & Unique Seeds**

Cotton - 165-180 days - This is the same cotton variety used for your t-shirts and jeans. Some varieties have naturally colored fibers instead of white. Grow it from the seed to hold them together. Cages may have sharp edges and rust. A truck bed is the best way to transport them. Please be prepared to take cages with you at the time of purchase. We are not able to hold cages for anyone.

**Straw Bales**

Straw makes a great, affordable mulch for your garden. Limit 6 bales for individual members.

**Cotton Burr Compost**

Cotton burrs are an excellent food source for beneficial soil organisms; helping aerate the soil and providing nutrients available to plants. Price for cotton burr compost are to be determined and will be based on market prices.

**Organic Fertilizer**

KCCG offers pelletized organic manure fertilizer. Members receive 10 pounds and may purchase additional quantities. All quantities are self-serve.

**Insect Control**

KCCG offers affordable pest control products that are natural and/or certified for organic gardening. Please visit our garden supplies webpage to buy or call us for available products.

**Flower Supplies**

In addition to seeds and plants, KCCG offers a variety of recommended garden supplies at low cost. You must be a 2024 KCCG member to purchase. Garden supplies available while supplies last. For a full list of garden supplies, please visit www.kccg.org/garden-supplies or scan the QR Code to the right:

**PLEASE NOTE: Garden supplies will be sold at market price.**

**Garden Tools**

In addition to the seeds and plants that we offer, we also sell the following garden supplies for personal sale only at our Swope Park office (6917 Kensington, Kansas City, MO 64132).

To see the full list of supplies, visit www.kccg.org/garden-supplies/

**Together We Grow!**

More than 45,000 households harvested food from a KCCG-supported garden or orchard in 2023. Put another way, our services reach 1 out of every 19 households in the KC metro area! Work of this scope truly takes a community – and wouldn’t be possible without the generosity of many volunteers and donors. Ready to get involved? Here’s how you can help:

**Make A Gift**

At KCCG, we believe that everyone should be able to enjoy healthy foods. We’re on a mission to ensure that families, schools and community groups have the affordable resources and knowledge they need to be successful in growing their own fruits and vegetables. Gifts to KCCG help us to subsidize the costs of plants, fertilizer and tillling services. They also enable us to offer technical assistance and educational resources free of charge.

**Make a one-time or monthly gift online at www.kccg.org/donate**

Kansas City Community Gardens is a 501(c)(3) non-profit organization; EIN 43-1356677. Gifts to KCCG are tax-deductible as allowed by IRS regulations.

**Volunteer**

Volunteers play a vital role in KCCG’s day-to-day operations and long-term success. Each year, volunteers donate thousands of hours service to support KCCG’s work.

Volunteers help to fill seed packs, start transplants, build raised garden beds, help in our front office, and more. Groups and individuals are welcomed. We have opportunities for everyone - whether you’re a novice gardener or a seasoned pro.

Learn more and sign up at www.kccg.org/volunteer or contact our Volunteer Coordinator at: volunteer@kccg.org

**To sign up for home tilling, visit the KCCG office. Please bring proof of income with you.**

Call 816.931.3877 to reserve a tiller.
Interested in growing your own food? KCCG is here to help!

KCCG is a non-profit organization that helps low-income households, schools and community groups to grow fruit and vegetables. We offer affordable plants & seeds, free workshops and expert advice.

For individuals & families:

KCCG offers an annual membership program. Membership fees are based on income and the number of people in your household and range from $2 to $45.

With your enrollment, you’ll receive:

- 10 free packs of seeds and the opportunity to buy more at low-cost member prices
- A free 10-lb. bag of fertilizer
- Starter plants, including vegetable and herb transplants, fruit trees, berry bushes and more at low-cost member prices
- Low-cost garden supplies, such as straw, compost and pest control products
- Low-cost tilling services and access to KCCG rental plot gardens

With a total investment of $25 or less and a little practice, it’s possible for a low-income KCCG member household to grow more than $600 of organic produce each year!

KCCG also helps schools and community groups to establish and sustain gardens and orchards. To learn more about all that we offer, see page 2.

Come Grow With Us!

KCCG is located in Swope Park at
6917 Kensington
