

# Applying Poultry Manure

---

KCCG offers organic fertilizer in the form of pelletized poultry manure. This product is "Omri listed" for organic production. 4-2-2 guaranteed analysis. This 4-2-2 fertilizer contains 4% nitrogen to support leafy green growth, 2% phosphorus to encourage strong roots and flowering, and 2% potassium to help plants stay healthy and resilient.

## Application Rates:

- For vegetables:
  - Apply fertilizer at the time of planting at the rate of 2 lbs (or 4 cups) per 100 sq. feet of seed bed and work into the soil.
  - For longer term fruiting plants (tomato, pepper, eggplant, cucumber, squash, melon, corn) reapply (when flower buds have formed) at 1-2 lbs (2-4 cups) per 100 sq. feet and rake lightly into soil.
- For perennial crops (berry plant, tree fruits, strawberries)- apply fertilizer early in the spring and again after plants have set fruit to give plants strength for the following season. Apply 1-2 lbs. per 100 sq. feet to base of plants and rake lightly into soil.
- For other small applications, two cups equals 1 lb.
- Store in a dry place

## Quantities:

- **All quantities are self-service.**

- 10 lb bag = \$2.50 for green cards, \$5.00 for yellow cards, and \$7.50 for orange & blue cards. We will provide plastic bags.
- 32 lbs (5 gallon bucket) = \$7.50 for green cards and \$15.00 for yellow cards, and \$22.50 for orange & blue card members. You must bring your own 5-gallon bucket.

## Do I Need Fertilizer or Compost?

- Use fertilizer to feed your plants and to encourage fruiting and production.
- Use compost to amend your soil. Hard soils need organic matter such as compost, not fertilizer.
